100% SOLIDS SELF-LEVELING EPOXY

UP TO 1/8" PER POUR
The versatile self-leveling formula pours up to 1/8" thick per pour.

SIMIRON TABLETOP EPOXY is a professional-grade, Low VOC, self-leveling, high-gloss protective coating. It creates a tough, high-gloss, crystal clear protective barrier up to 1/8 inch thick.

The easy-to-measure 1:1 mix ratio is great for countertops, bars, live-edge tables, wood furniture, artwork, and other creative applications. **SIMIRON TABLETOP EPOXY** is waterproof, heat and chemical resistant, and can be applied over 90 times thicker than traditional varnishes for the ultimate layer of protection.

SIMIRON TABLETOP EPOXY can also be used for arts and craft projects, such as embedding items, protecting documents and photos, and more!

For a truly custom appearance, **SIMIRON TABLETOP EPOXY** can be mixed with **SIMIRON METALLIC ADDITIVES**, pigments and mica powders, glitter, glow-in-the-dark pigments, alcohol inks, resin dyes, and tints to create a truly custom appearance.

HIGH GLOSS – CRYSTAL CLEAR
A clean UV resistant crystal clear finish with every application!

EXTREME DURABILITY
Creates a waterproof protective barrier that is chemical, heat, and impact resistant.

ZERO VOC – NO ODOR
Easy-to-use Easy-to-measure.
1:1 mix ratio with no offensive odors.
